GOTA DE PLATA AUDITORIUM THEATER, PACHUCA, MEXICO

Left: Foyer. | Right: First floor plan.

The auditorium is situated at the southern tip of David Ben Gurion cultural and recreation park. It is positioned directly in front of a plaza with brightly colored mosaics that are reflected in the large surface of mirror glass mullions at the entrance to the auditorium. While the front of the building is mostly made up of huge glass windows, increasing transparency inside

the foyer which provides a smooth transition into the auditorium, the back part of the building consists of a stone volume, housing the stage, backstage and theater machinery. Made up of concrete and steel, the outside is kept in black and silver tones, whereas red and brown colors were used inside in order to represent the project's vitality.

From left to right, from above to below:
Principal façade detail, main façade, concert hall.
Right: View to the mural plaza.
